

# Make Life a Celebration

thereby

## Starting Your Heaven Today

Asking the Holy Spirit to be with us.

### Promise

- One spiritual hint each month
- One hint from nature/science each month
  - To make life a celebration --- and thereby
  - Starting your heaven today/NOW

### Spiritual Hint

**God is "I am who I am" Ex 3:14**

**"This is My name forever; this is My title for all generations." Ex 3:15**

Celebrating the fact that God is. This might leave some of us cold. Some might say, "So what? God is. I take that for granted.

**Hint to appreciate, i.e., help us get excited and celebrate any fact that is.**

**Suppose the fact was not. For example: suppose God was not!**

**Where would you or I be if God was NOT?**

The above is totally dark indicating where we would be if God was not. There would not be any light. All would be without light.

### Suggestion

**We celebrate the fact that *God is.***

**We thank Him for sharing His "I AM" with us**

**Because now each of us can say "*I am!*"**

### CAUTION --- Point to Ponder

**Don't be surprised if the above does not grab you at first. However, with prayer and the Holy Spirit over time the fact That God is and shares His "I am" with us can be huge.**

## Hint 2 – From Nature and Science

### Challenge

To discover a method to be able to celebrate life NOW,  
i.e., anytime, and anyplace.

### Possibilities If We Could

If we knew how to celebrate right NOW,  
When the next moment comes we could celebrate again.  
We can go from **each now, to every now, to our entire life.**

### Solution

#### The Rule Of Ten

At any time (any NOW) you can discover 10 things  
that are madeup of 10 different molecules  
that God created to help us in some way.

### Example

-glass in computer	-cyan ink	-magenta ink
-yellow ink	-plastic in keyboard	-plastic in mouse
-trees that make paper	-air we breathe	-light helps us see
-brains in computer	-cell phone	-cover of cell phone

**Bit of humility:** I did little to create any of the above, *but I benefit hugely.*

**Bit of physics and chemistry** – the molecules in each are all different

#### A Huge WOW

God is an amazing architect

He did all the above – and everything else we see and use-  
with a simple trinity of elements :electrons, protons neutrons

When you make life a celebration NOW  
You start your heaven NOW

**Suggestion**

Put the above in the place where you begin your day.  
Ask the Holy Spirit to guide you to make today the celebration He wants to join.

**My wish**

*You can make life a celebration*

*Pleasing God in the process*

*And starting your own heaven now.*
